Career Objective

I am a full stack developer with 6 months of proven experience, having worked in internships and competitions, in addition to personal projects. In the coming years, my focus is to deepen my skills in frontend and backend, acquiring more practical experience. In the long term, I intend to migrate to application development and, eventually, to game creation.

Professional Experiences

- Achievo - Jun 2024 / Ago 2024
Position: **Junior Full Stack Developer**
 - Bug fixes, refactoring
 - Implementation of interfaces and new features

Education

- Full Stack Web Development - Trybe, completion in **March 2024**.
1,500 hours of classes focusing on: Introduction to software development, front-end, back-end, computer science, software engineering, agile methodologies and behavioral skills.
- Incomplete Degree in Mechanical Engineering - Federal Institute of Minas Gerais, 2022.
